IIE Transactions (2006) **38**, 1133–1147

DESIGN & MANUFACTURING

AUTHOR INDEX FOR 2006

Akinc, U. and J. Meredith; *Choosing the appropriate capacity for a make-to-forecast production environment using a Markov analysis approach*; October; 847

Blumenfeld, D.E. and J. Li; *Quantitative analysis of a transfer production line with Andon*; October; 837
Bukchin, Y., R.D. Meller and Q. Liu; *Assembly system facility design*; January; 67

Chen, R.-S., R.-C. Wu and S.S. Chian; *Design of a product quality control system based on the use of data mining techniques*; January; 39
Chen, Y., Y. Cui and J. Wu; *Selecting the best sheet length for the steel stock used in circular blank production*; October; 829
Chian, S.S., R.-C. Wu and R.-S. Chen; *Design of a product quality control system based on the use of data mining techniques*; January; 39
Cui, Y., Y. Chen and J. Wu; *Selecting the best sheet length for the steel stock used in circular blank production*; October; 829

Dolgui, A., B. Finel, N.N. Guschinsky, G.M. Levin and F.B. Vernadat; *MIP approach to balancing transfer lines with blocks of parallel operations*; October; 869

Finel, B., A. Dolgui, N.N. Guschinsky, G.M. Levin and F.B. Vernadat; *MIP approach to balancing transfer lines with blocks of parallel operations*; October; 869

Gue, K.R., R.D. Meller and J.D. Skufca; *The effects of pick density on order picking areas with narrow aisles*; October; 859
Gue, K.R.; *Very high density storage systems*; January; 93
Guschinsky, N.N., A. Dolgui, B. Finel, G.M. Levin and F.B. Vernadat; *MIP approach to balancing transfer lines with blocks of parallel operations*; October; 869

Hillier, F.S. and M.S. Hillier; *Simultaneous optimization of work and buffer space in unpaced production lines with random processing times*; January; 53
Hillier, M.S. and F.S. Hillier; *Simultaneous optimization of work and buffer space in unpaced production lines with random processing times*; January; 53

Jack Feng, C.-X., Z.-G. (Samuel) Yu and A. Kusiak; *Selection and validation of predictive regression and neural network models based on designed experiments*; January; 13
Jiang, K., H.L. Lee and R.W. Seifert; *Satisfying customer preferences via mass customization and mass production*; January; 25

Kusiak, A., C.-X. Jack Feng and Z.-G. (Samuel) Yu; *Selection and validation of predictive regression and neural network models based on designed experiments*; January; 13

Lamond, B.F. and M.S. Sodhi; *Minimizing the expected processing time on a flexible machine with random tool lives*; January; 1
Lee, H.L., K. Jiang and R.W. Seifert; *Satisfying customer preferences via mass customization and mass production*; January; 25
Levin, G.M., Dolgui, A., B. Finel, N.N. Guschinsky and F.B. Vernadat; *MIP approach to balancing transfer lines with blocks of parallel operations*; October; 869
Li, J. and D.E. Blumenfeld; *Quantitative analysis of a transfer production line with Andon*; October; 837
Liu, Q., Y. Bukchin and R.D. Meller; *Assembly system facility design*; January; 67

Meller, R.D., K.R. Gue and J.D. Skufca; *The effects of pick density on order picking areas with narrow aisles*; October; 859
Meller, R.D., Y. Bukchin and Q. Liu; *Assembly system facility design*; January; 67
Meredith, J. and U. Akinc; *Choosing the appropriate capacity for a make-to-forecast production environment using a Markov analysis approach*; October; 847
Moskowitz, H., H. Tarakci, K. Tang and R. Plante; *Maintenance outsourcing of a multi-process manufacturing system with multiple contractors*; January; 81
Nelkenbaum, B.D. and D. Sinreich; *Determining production sequences for single-stage multifunctional machining systems based on the tradeoff between fixture cost, re-fixturing and tool replenishment*; October; 813

Plante, R., H. Tarakci, K. Tang and H. Moskowitz; *Maintenance outsourcing of a multi-process manufacturing system with multiple contractors*; January; 81

Roodbergen, K.J. and I.F.A. Vis; *A model for warehouse layout*; October; 799

Seifert, R.W., K. Jiang and H.L. Lee; *Satisfying customer preferences via mass customization and mass production*; January; 25
Sinreich, D. and B.D. Nelkenbaum; *Determining production sequences for single-stage multifunctional machining systems based on the tradeoff between fixture cost, re-fixturing and tool replenishment*; October; 813
Skufca, J.D., K.R. Gue and R.D. Meller; *The effects of pick density on order picking areas with narrow aisles*; October; 859
Sodhi, M.S. and B.F. Lamond; *Minimizing the expected processing time on a flexible machine with random tool lives*; January; 1

Tang, K., H. Tarakci, H. Moskowitz and R. Plante; *Maintenance outsourcing of a multi-process manufacturing system with multiple contractors*; January; 81
Tarakci, H., K. Tang, H. Moskowitz and R. Plante; *Maintenance outsourcing of a multi-process manufacturing system with multiple contractors*; January; 81

Vernadat, F.B., A. Dolgui, B. Finel, N.N. Guschinsky, and G.M. Levin; *MIP approach to balancing transfer lines with blocks of parallel operations*; October; 869
Vis, I.F.A. and K.J. Roodbergen; *A model for warehouse layout*; October; 799

Wu, J., Y. Cui and Y. Chen; *Selecting the best sheet length for the steel stock used in circular blank production*; October; 829
Wu, R.-C., R.-S. Chen and S.S. Chian; *Design of a product quality control system based on the use of data mining techniques*; January; 39

Yu (Samuel), Z.-G., C.-X. Jack Feng and A. Kusiak; *Selection and validation of predictive regression and neural network models based on designed experiments*; January; 13

SUBJECT INDEX FOR 2006

400 – Auto industry
Bukchin, Y., R.D. Meller and Q. Yu; *Assembly system facility design*; January; 67

500 – Manufacturing
Bukchin, Y., R.D. Meller and Q. Yu; *Assembly system facility design*; January; 67

1040 – Design optimization
Roodbergen, K.J. and I.F.A. Vis; *A model for warehouse layout*; October; 799

1110 – Machine tools
Lamond, B.F. and M.S. Sodhi; *Minimizing the expected processing time on a flexible machine with random tool lives*; January; 1

1200 – Manufacturing processes
Cui, Y., Y. Chen and J. Wu; *Selecting the best sheet length for the steel stock used in circular blank production*; October; 829
Hillier, M.S. and F.S. Hillier; *Simultaneous optimization of work and buffer space in unpaced production lines with random processing times*; January; 53
Tarakci, H., K. Tang, H. Moskowitz and R. Plante; *Maintenance outsourcing of a multi-process manufacturing system with multiple contractors*; January; 81

1240 – Material forming
Cui, Y., Y. Chen and J. Wu; *Selecting the best sheet length for the steel stock used in circular blank production*; October; 829

1280 – Process optimization
Cui, Y., Y. Chen and J. Wu; *Selecting the best sheet length for the steel stock used in circular blank production*; October; 829
Hillier, M.S. and F.S. Hillier; *Simultaneous optimization of work and buffer space in unpaced production lines with random processing times*; January; 53

1320 – Flexible manufacturing systems
Lamond, B.F. and M.S. Sodhi; *Minimizing the expected processing time on a flexible machine with random tool lives*; January; 1
Sinreich, D. and B.D. Nelkenbaum; *Determining production sequences for single-stage multifunctional machining systems based on the tradeoff between fixture cost, re-fixturing and tool replenishment*; October; 813

1330 – Manufacturing systems analysis
Dolgui, A., B. Finel, N.N. Guschinsky, G.M. Levin and F.B. Vernadat; *MIP approach to balancing transfer lines with blocks of parallel operations*; October; 869

1360 – Manufacturing systems design
Bukchin, Y., R.D. Meller and Q. Yu; *Assembly system facility design*; January; 67
Li, J. and D.E. Blumenfeld; *Quantitative analysis of a transfer production line with Andon*; October; 837

1370 – Manufacturing systems modeling
Sinreich, D. and B.D. Nelkenbaum; *Determining production sequences for single-stage multifunctional machining systems based on the tradeoff between fixture cost, re-fixturing and tool replenishment*; October; 813

1400 – Material handling
Gue, K.R.; *Very high density storage systems*; January; 93

1410 – Analysis methods
Gue, K.R., R.D. Meller and J.D. Skifca; *The effects of pick density on order picking areas with narrow aisles*; October; 859

1430 – Equipment: storage
Gue, K.R.; *Very high density storage systems*; January; 93

1440 – Facilities
Bukchin, Y., R.D. Meller and Q. Yu; *Assembly system facility design*; January; 67
Gue, K.R., R.D. Meller and J.D. Skifca; *The effects of pick density on order picking areas with narrow aisles*; October; 859
Roodbergen, K.J. and I.F.A. Vis; *A model for warehouse layout*; October; 799

1450 – Material handling functions
Roodbergen, K.J. and I.F.A. Vis; *A model for warehouse layout*; October; 799

2000 – Applied optimization
Cui, Y., Y. Chen and J. Wu; *Selecting the best sheet length for the steel stock used in circular blank production*; October; 829

2010 – Combinatorial optimization
Bukchin, Y., R.D. Meller and Q. Yu; *Assembly system facility design*; January; 67
Cui, Y., Y. Chen and J. Wu; *Selecting the best sheet length for the steel stock used in circular blank production*; October; 829

2100 – Applied probability
Akinc, U. and J. Meredith; *Choosing the appropriate capacity for a make-to-forecast production environment using a Markov analysis approach*; October; 847

2180 – Markov chains
Akinc, U. and J. Meredith; *Choosing the appropriate capacity for a make-to-forecast production environment using a Markov analysis approach*; October; 847

2260 – Neural networks
Jack Feng, C.X., Z.-G. (Samuel) Yu and A. Kusiak; *Selection and validation of predictive regression and neural network models based on designed experiments*; January; 13

3300 – Production control
Sinreich, D. and B.D. Nelkenbaum; *Determining production sequences for single-stage multifunctional machining systems based on the tradeoff between fixture cost, re-fixturing and tool replenishment*; October; 813

3410 – Capacity planning
Akinc, U. and J. Meredith; *Choosing the appropriate capacity for a make-to-forecast production environment using a Markov analysis approach*; October; 847

3650 – Demand management
Jiang, K., H.L. Lee and R.W. Seifert; *Satisfying customer preferences via mass customization and mass production*; January; 25

4120 – Design of experiments
Jack Feng, C.X., Z.-G. (Samuel) Yu and A. Kusiak; *Selection and validation of predictive regression and neural network models based on designed experiments*; January; 13

4400 – Reliability engineering
Tarakci, H., K. Tang, H. Moskowitz and R. Plante; *Maintenance outsourcing of a multi-process manufacturing system with multiple contractors*; January; 81

4460 – Maintenance
Tarakci, H., K. Tang, H. Moskowitz and R. Plante; *Maintenance outsourcing of a multi-process manufacturing system with multiple contractors*; January; 81

GUEST REVIEWERS FOR 2006

Dr. Ronald G. Askin, University of Arizona

Rajan Batta, University at Buffalo (SUNY)
Ratna Babu Chinnam, Wayne State University
Joseph Bukchin, Tel Aviv University
Sergiy Butenko, Texas A&M University

Franco Caron, Politecnico di Milano

Tapas Das, University of South Florida

Kai Furmans, Institute for Material Handling & Logistic Systems

Stanley Gershwin, Massachusetts Institute of Technology

Thom Hodgson, North Carolina State University

Kai Jiang, Massachusetts Institute of Technology
Ajay Joneja, Hong Kong University of Science & Technology

Selcuk Karabati, Koc University
Rene de Koster, Erasmus University, Rotterdam School of Management
Ananth Krishnamurthy, Rensselaer Polytechnic Institute
Soundar Kumara, The Pennsylvania State University

Mark Lewis, Cornell University
George Liberopoulos, University of Thessaly

Joel Nachlas, Virginia Polytechnic Institute and State University

P.R. Parthasarathy, Indian Institute of Technology - Madras
Pratikh J. Parikh, Virginia Polytechnic Institute and State University
Patrick Patterson, Texas Tech University
Brett Peters, Texas A&M University
Stephen Powell, Dartmouth College

Ram Rachamadugu, University of Toledo
Saibal Ray, McGill University

Baris Tan, Koc University
Manoj Tiwari, National Institute of Foundry and Forge Technology, Ranchi, India

Halit Uster, Texas A&M University

George Vairaktarakis, Case Western Reserve University

M.A. Wortman, Texas A&M University

Jian Yang, New Jersey Institute of Technology
Jui-Pin Yang, Industrial Technology Research Institute

Chen Zhou, Georgia Institute of Technology
Nico Vandaele, University of Antwerp & Catholic University of Leuven

SCHEDULING & LOGISTICS

AUTHOR INDEX FOR 2006

Aparisi, F., G. Avendaño and J. Sanz; *Techniques to interpret T^2 control chart signals*; August; 647
Avendaño, G., F. Aparisi and J. Sanz; *Techniques to interpret T^2 control chart signals*; August; 647

Berk, E. and A.Ö. Toy; *Dynamic lot sizing problem for a warm/cold process*; November; 1027
Berman, O. and Z. Drezner; *Location of congested capacitated facilities with distance-sensitive demand*; March; 213
Berman, O., D. Krass and J. Wang; *Locating service facilities to reduce lost demand*; November; 933
Bhootra, A., S.C. Sarin and H.D. Sherali; *A precedence-constrained asymmetric traveling salesman model for disassembly optimization*; March; 223
Bollapragada, R. and U.S. Rao; *Replenishment planning in discrete-time, capacitated, non- stationary, stochastic inventory systems*; July; 605

Briskorn, D.; *A note on capacitated lot sizing with setup carry over*; November; 1045
Çalışkan, C. and R.W. Hall; *A static empty equipment allocation model for long-haul networks with constrained crew routes*; November; 947
Chang, C.-W., W.L. Pearn, P.C. Lin, and Y.C. Wu; *Quality yield measure for processes with asymmetric tolerances*; August; 619
Chew, E.K.P., L.H. Lee and Y.L. Lau; *Component commonality in assembled-to-stock systems*; March; 239
Cho, R.K., Y. Gerchak and S. Ray; *Coordination of quantity and shelf-retention timing in the video movie rental industry*; July; 525

Daskin, M.S. and L.V. Snyder; *Stochastic* p*-robust location problems*; November; 971
Davis, D.J., J.M. Lucas and E.M. Saniga; *Detecting improvement using Shewhart attribute control charts when the lower control limitis zero*; August; 699
del Castillo, E. and R. Rajagopal; *A Bayesian method for robust tolerance control and parameter design*; August; 685
Dobson, G. and E.J. Pinker; *The value of sharing lead time information*; March; 171
Drezner, Z. and O. Berman; *Location of congested capacitated facilities with distance-sensitive demand*; March; 213

Feng, Q. and K.C. Kapur; *Economic development of specifications for 100% inspection based on asymmetric quality lossfunctions*; August; 659

Gerchak, Y., R.K. Cho and S. Ray; *Coordination of quantity and shelf-retention timing in the video movie rental industry*; July; 525
Gilbert, S.M., Y. Xia and G. Yu; *Strategic outsourcing for competing OEMs that face cost reduction opportunities*; November; 903
Hall, R.W. and C. Çalışkan; *A static empty equipment allocation model for long-haul networks with constrained crew routes*; November; 947

Herer, Y.T., M. Tzur and E. Yücesan; *The multilocation transshipment problem*; March; 185
Hodgson, T.J., P.M. Stanfield and R.E. King; *Determining sequence and ready times in a remanufacturing system*; July; 565

Smilowitz, K.; *Multi-resource routing with flexible tasks: an application in drayage operations*; July; 577

Kapur, K.C. and Q. Feng; *Economic development of specifications for 100% inspection based on asymmetric quality lossfunctions*; August; 659
Ketzenberg, M., R. Metters and J. Semple; *A heuristic for multi-item production with seasonal demand*; March; 201
King, R.E., P.M. Stanfield and T.J. Hodgson; *Determining sequence and ready times in a remanufacturing system*; July; 565
Krass, D., O. Berman and J. Wang; *Locating service facilities to reduce lost demand*; November; 933

Lau, A.H.L., H.-S. Lau and Y.-W. Zhou; *Considering asymmetrical manufacturing cost information in a two-echelon system that uses price-only contracts*; March; 253
Lau, H.-S., A.H.L. Lau and Y.-W. Zhou; *Considering asymmetrical manufacturing cost information in a two-echelon system that uses price-only contracts*; March; 253
Lau, Y.L., E.K.P. Chew and L.H. Lee; *Component commonality in assembled-to-stock systems*; March; 239
Lee, L.H., E.K.P. Chew and Y.L. Lau; *Component commonality in assembled-to-stock systems*; March; 239
Lei, L., S. Liu, A. Ruszczynski and S. Park; *On the integrated production, inventory, and distribution routing problem*; November; 955
Lin, P.C., W.L. Pearn, Y.C. Chang and C.-W. Wu; *Quality yield measure for processes with asymmetric tolerances*; August; 619
Liu, S., L. Lei, A. Ruszczynski and S. Park; *On the integrated production, inventory, and distribution routing problem*; November; 955
Logendran, R. and P. Parthanadee; *Periodic product distribution from multi-depots under limited supplies*; November; 1009
Lucas, J.M., D.J. Davis and E.M. Saniga; *Detecting improvement using Shewhart attribute control charts when the lower control limitis zero*; August; 699

Metters, R., M. Ketzenberg and J. Semple; *A heuristic for multi-item production with seasonal demand*; March; 201
Moskowitz, H., H. Tarakci, K. Tang and R. Plante; *Incentive maintenance outsourcing contracts for channel coordination and improvement*; August; 671
Muriel, A. and R. Ruiz-Benitez; *Optimal implementation and benefits of rolling inventory*; July; 591

Netessine, S., N. Rudi and Y. Wang; *Inventory competition and incentives to back-order*; November; 883

Park, S., L. Lei, S. Liu and A. Ruszczynski; *On the integrated production, inventory, and distribution routing problem*; November; 955
Parthanadee, P. and R. Logendran; *Periodic product distribution from multi-depots under limited supplies*; November; 1009
Pearn, W.L., P.C. Lin, Y.C. Chang and C.-W. Wu; *Quality yield measure for processes with asymmetric tolerances*; August; 619
Pinker, E.J. and G. Dobson; *The value of sharing lead time information*; March; 171
Plante, R., H. Tarakci, K. Tang and H. Moskowitz; *Incentive maintenance outsourcing contracts for channel coordination and improvement*; August; 671

Qi, X.; *A logistics scheduling model: scheduling and transshipment for two processing centers*; July; 537

Rajagopal, R. and E. del Castillo; *A Bayesian method for robust tolerance control and parameter design*; August; 685
Rao, U.S. and R. Bollapragada; *Replenishment planning in discrete-time, capacitated, non- stationary, stochastic inventory systems*; July; 605
Ray, S., Y. Gerchak and R.K. Cho; *Coordination of quantity and shelf-retention timing in the video movie rental industry*; July; 525
Rudi, N., S. Netessine and Y. Wang; *Inventory competition and incentives to back-order*; November; 883
Ruiz-Benitez, R. and A. Muriel; *Optimal implementation and benefits of rolling inventory*; July; 591
Runger, G.C. and M.C. Testik; *Multivariate one-sided control charts*; August; 635
Ruszczynski, A., L. Lei, S. Liu and S. Park; *On the integrated production, inventory, and distribution routing problem*; November; 955

Saniga, E.M., J.M. Lucas and D.J. Davis; *Detecting improvement using Shewhart attribute control charts when the lower control limitis zero*; August; 699
Sanz, J., F. Aparisi and G. Avendaño; *Techniques to interpret T^2 control chart signals*; August; 647
Sarin, S.C., H.D. Sherali and A. Bhootra; *A precedence-constrained asymmetric traveling salesman model for disassembly optimization*; March; 223
Seifert, R.W., U.W. Thonemann and M.A. Sieke; *Relaxing channel separation: Integrating a virtual store into the supply chain via transshipments*; November; 917
Semple, J., M. Ketzenberg and R. Mettehrs; *A heuristic for multi-item production with seasonal demand*; March; 201
Sherali, H.D., S.C. Sarin and A. Bhootra; *A precedence-constrained asymmetric traveling salesman model for disassembly optimization*; March; 223
Sieke, M.A., R.W. Seifert and U.W. Thonemann; *Relaxing channel separation: Integrating a virtual store into the supply chain via transshipments*; November; 917
Snyder L.V.; *Facility location under uncertainty: a review*; July; 547
Snyder, L.V. and M.S. Daskin; *Stochastic p-robust location problems*; November; 971
Stanfield, P.M., R.E. King and T.J. Hodgson; *Determining sequence and ready times in a remanufacturing system*; July; 565

Tang, K., H. Tarakci, H. Moskowitz and R. Plante; *Incentive maintenance outsourcing contracts for channel coordination and improvement*; August; 671
Tarakci, H., K. Tang, H. Moskowitz and R. Plante; *Incentive maintenance outsourcing contracts for channel coordination and improvement*; August; 671
Testik, M.C. and G.C. Runger; *Multivariate one-sided control charts*; August; 635
Thonemann, U.W., R.W. Seifert and M.A. Sieke; *Relaxing channel separation: Integrating a virtual store into the supply chain via transshipments*; November; 917
Toy, A.Ö. and E. Berk; *Dynamic lot sizing problem for a warm/cold process*; November; 1027
Tzur, M., Y.T. Herer and E. Yücesan; *The multilocation transshipment problem*; March; 185

Wang, J., O. Berman and D. Krass; *Locating service facilities to reduce lost demand*; November; 933
Wang, Y., S. Netessine and N. Rudi; *Inventory competition and incentives to back-order*; November; 883
Wilhelm, W.E. and X. Zhu; *Scheduling and lot sizing with sequence-dependent setup: A literature review*; November; 987
Wu, C.-W., W.L. Pearn, P.C. Lin, and Y.C. Chang; *Quality yield measure for processes with asymmetric tolerances*; August; 619

Xia, Y., S.M. Gilbert and G. Yu; *Strategic outsourcing for competing OEMs that face cost reduction opportunities*; November; 903

Yu, G., S.M. Gilbert and Y. Xia; *Strategic outsourcing for competing OEMs that face cost reduction opportunities*; November; 903
Yücesan, E., Y.T. Herer and M. Tzur; *The multilocation transshipment problem*; March; 185

Zhou, Y.-W., A.H.L. Lau and H.-S. Lau; *Considering asymmetrical manufacturing cost information in a two-echelon system that uses price-only contracts*; March; 253

Zhu, X. and W.E. Wilhelm; *Scheduling and lot sizing with sequence-dependent setup: A literature review*; November; 987

SUBJECT INDEX FOR 2006

130 – Entertainment services
Gerchak, Y., R.K. Cho and S. Ray; *Coordination of quantity and shelf-retention timing in the video movie rental industry*; July; 525

150 – Retail services
Netessine, S., N. Rudi and Y. Wang; *Inventory competition and incentives to back-order*; November; 883
Seifert, R.W., U.W. Thonemann and M.A. Sieke; *Relaxing channel separation: integrating a virtual store into the supply chain via transshipments*; November; 917

430 – Process industries
Toy, A.Ö. and E. Berk; *Dynamic lot sizing problem for a warm/cold process*; November; 1027

650 – Internet
Seifert, R.W., U.W. Thonemann and M.A. Sieke; *Relaxing channel separation: integrating a virtual store into the supply chain via transshipments*; November; 917

1210 – Assembly
Sarin, S.C., H.D. Sherali and A. Bhootra; *A precedence constrained asymmetric traveling salesman model for disassembly optimization*; March; 223

1500 – Process planning
Sarin, S.C., H.D. Sherali and A. Bhootra; *A precedence constrained asymmetric traveling salesman model for disassembly optimization*; March; 223

3010 – Control policy
Bollapragada, R. and U.S. Rao; *Replenishment planning in discrete-time, capacitated, non-stationary, stochastic inventory systems*; July; 605
Herer, Y.T., M. Tzur and E. Yücesan; *The multi-location transshipment problem*; March; 185
Netessine, S., N. Rudi and Y. Wang; *Inventory competition and incentives to back-order*; November; 883

3020 – Coordination
Gerchak, Y., R.K. Cho and S. Ray; *Coordination of quantity and shelf-retention timing in the video movie rental industry*; July; 525
Gilbert, S.M., Y. Xia and G. Yu; *Strategic outsourcing for competing OEMs that face cost reduction opportunities*; November; 903
Lau, A.H.L., H.-S. Lau and Y.-W. Zhou; *Considering asymmetrical manufacturing cost information in a two-echelon system that uses price-only contracts*; March; 253
Seifert, R.W., U.W. Thonemann and M.A. Sieke; *Relaxing channel separation: integrating a virtual store into the supply chain via transshipments*; November; 917

3040 – Material management
Muriel, A. and R. Ruiz-Benitez; *Optimal implementation and benefits of rolling inventory*; July; 591
Parthanadee, P. and R. Logendran; *Periodic product distribution from multi-depots under limited supplies*; November; 1009

3050 – Multi-stage systems
Chew, E.K.P., L.H. Lee and Y.L. Lau; *Component commonality in assembled-to-stock systems*; March; 239

3070 – Random yield
Bollapragada, R. and U.S. Rao; *Replenishment planning in discrete-time, capacitated, non-stationary, stochastic inventory systems*; July; 605

3100 – Inter-disciplinary and cross-functional studies
Herer, Y.T., M. Tzur and E. Yücesan;; *The multi-location transshipment problem*; March; 185

3140 – Marketing/manufacturing interface
Lau, A.H.L., H.-S, Lau and Y.-W. Zhou;; *Considering asymmetrical manufacturing cost information in a two-echelon system that uses price-only contracts*; March; 253
Netessine, S., N. Rudi and Y. Wang; *Inventory competition and incentives to back-order*; November; 883

3150 – Supply chain management
Gilbert, S.M., Y. Xia and G. Yu; *Strategic outsourcing for competing OEMs that face cost reduction opportunities*; November; 903
Seifert, R.W., U.W. Thonemann and M.A. Sieke; *Relaxing channel separation: integrating a virtual store into the supply chain via transshipments*; November; 917

3170 – Integrated production/distribution
Lei, L., S. Liu, A. Ruszczynski and S. Park; *On the integrated production, inventory, and distribution routing problem*; November; 955
Qi, X.; *A logistics scheduling model: scheduling and transshipment for two processing centers*; July; 537

3210 – Distribution planning
Lei, L., S. Liu, A. Ruszczynski and S. Park; *On the integrated production, inventory, and distribution routing problem*; November; 955
Parthanadee, P. and R. Logendran; *Periodic product distribution from multi-depots under limited supplies*; November; 1009

3215 – Facility location
Berman, O., D. Krass and J. Wang; *Locating service facilities to reduce lost demand*; November; 933
Berman, O. and Z. Drezner; *Location of congested capacitated facilities with distance sensitive demand*; March; 213
Snyder, L.V. and M.S. Daskin; *Stochastic* p*-robust location problems*; November; 971
Snyder, L.V.; *Facility location under uncertainty: a review*; July; 547

3250 – Transportation
Çalışkan, C. and R.W. Hall; *A Static empty equipment allocation model for long-haul networks with constrained crew routes*; November; 947

3255 – Vehicle routing/scheduling
Çalışkan, C. and R.W. Hall; *A Static empty equipment allocation model for long-haul networks with constrained crew routes*; November; 947
Lei, L., S. Liu, A. Ruszczynski and S. Park; *On the integrated production, inventory, and distribution routing problem*; November; 955
Muriel, A. and R. Ruiz-Benitez; *Optimal implementation and benefits of rolling inventory*; July; 591
Parthanadee, P. and R. Logendran; *Periodic product distribution from multi-depots under limited supplies*; November; 1009
Smilowitz, K.; *Multi-resource routing with flexible tasks: an application in drayage operations*; July; 577

3320 – Kitting
Chew, E.K.P., L.H. Lee and Y.L. Lau; *Component commonality in assembled-to-stock systems*; March; 239

OPERATIONS ENGINEERING

AUTHOR INDEX FOR 2006

Barto, Andrew G., Jennie Si, Warren Buckler Powell and Don Wunsch (Eds.); *Handbook of Learning and Approximate Dynamic Programming*; February; 169

Wunsch, Don, Jennie Si, Andrew G. and Warren Buckler Powell (Eds.); *Handbook of Learning and Approximate Dynamic Programming*; February; 169

Si, Jennie, Andrew G., Warren Buckler Powell and Don Wunsch (Eds.); *Handbook of Learning and Approximate Dynamic Programming*; February; 169

Powell, Warren Buckler, Jennie Si, Andrew G. and Don Wunsch (Eds.); *Handbook of Learning and Approximate Dynamic Programming*; February; 169

Barton, R.R., V.C.P. Chen, K.-L. Tsui and M. Meckesheimer; *A review on design, modeling and applications of computer experiments*; April; 273

Batur, D. and S.-H. Kim; *Fully sequential selection procedures with a parabolic boundary*; September; 749

Baudin, M. Reviewed by J. Bard; *Lean Logistics: The Nuts and Bolts of Delivering Materials and Goods*; September; 797

Ben-Daya, M. and S. El-Ferik; *Age-based hybrid model for imperfect preventive maintenance*; April; 365

Camponogara, E. and P. Nakashima; *Optimizing gas-lift production of oil wells: piecewise linear formulation and computational analysis*; February; 159

Chao, X. and S. X. Zhou; *Joint inventory-and-pricing strategy for a stochastic continuous-review system*; May; 401

Chen, V.C.P., K.-L. Tsui, R.R. Barton and M. Meckesheimer; *A review on design, modeling and applications of computer experiments*; April; 273

Chung, W., S. Talluri and R. Narasimhan; *An optimization model for phased supplier integration into e-procurement systems*; May; 389

Cook, W.D., R.H. Green and J. Zhu; *Dual-role factors in data envelopment analysis*; February; 91

Dessouky, M.M., Q. Lu, J. Zhao and R.C. Leachman; *An exact solution procedure to determine the optimal dispatching times for complex rail networks*; February; 127

Ding, Y., S.S. Mandroli and A.K. Shrivastava; *A survey of inspection strategy and sensor distribution studies in discrete-part manufacturing processes*; April; 309

El-Ferik, S. and M. Ben-Daya; *Age-based hybrid model for imperfect preventive maintenance*; April; 365

Elsayed, E.A., H. Liao and X. Wang; *An extended linear hazard regression model with application to time-dependent dielectric breakdown of thermal oxides*; April; 329

Fadlalla, A. and T. Munakata; *Constraint isomorphism and the generation of stochastic data*; May; 437

Green, R.H., W.D. Cook and J. Zhu; *Dual-role factors in data envelopment analysis*; February; 91

Hartman, J.C. and A. Murphy; *Finite-horizon equipment replacement analysis*; May; 409

Huang, Q. and H. Wang; *Error cancellation modeling and its application to machining process control*; April; 355

Iskander, W.H. and S.T.A. Niaki; *A principal-components approach to assign confidence intervals in steady-state simulation*; February; 103

Jin, N. and S. Zhou; *Signature construction and matching for fault diagnosis in manufacturing processes through fault space analysis*; April; 341

Kim, S.-H. and D. Batur; *Fully sequential selection procedures with a parabolic boundary*; September; 749

Kotz, S. and J.R. van Dorp; *A novel method for fitting unimodal continuous distributions on a bounded domain utilizing expert judgment estimates*; May; 421

Kulkarni, S., A. Marar and W.B. Powell; *Combining cost-based and rule-based knowledge in complex resource allocation problems*; February; 145

Kumar, S. and D.A. Nottestad; *Capacity design: an application using discrete-event simulation and designed experiments*; September; 729

Kumar, S. and D.A. Nottestad; *Integrated simulation application design for short-term production scheduling*; September; 737

Lada, E.K., N.M. Steiger and J.R. Wilson; *Performance evaluation of recent procedures for steady-state simulation analysis*; September; 711

Leachman, R.C., M.M. Dessouky, Q. Lu and J. Zhao; *An exact solution procedure to determine the optimal dispatching times for complex rail networks*; February; 127

Liao, H., E.A. Elsayed and X. Wang; *An extended linear hazard regression model with application to time-dependent dielectric breakdown of thermal oxides*; April; 329

Lu, Q., M.M. Dessouky, J. Zhao and R.C. Leachman; *An exact solution procedure to determine the optimal dispatching times for complex rail networks*; February; 127

Mandroli, S.S., A.K. Shrivastava and Y. Ding; *A survey of inspection strategy and sensor distribution studies in discrete-part manufacturing processes*; April; 309

Marar, A., W.B. Powell and S. Kulkarni; *Combining cost-based and rule-based knowledge in complex resource allocation problems*; February; 145

Meckesheimer, M., V.C.P. Chen, K.-L. Tsui and R.R. Barton; *A review on design, modeling and applications of computer experiments*; April; 273

Mishra, D. and D. Veermani; *An ascending price procurement auction for multiple items with unit supply*; February; 113

Munakata, T. and A. Fadlalla; *Constraint isomorphism and the generation of stochastic data*; May; 437

Murphy, A. and J.C. Hartman; *Finite-horizon equipment replacement analysis*; May; 409

Nakashima, P. and E. Camponogara; *Optimizing gas-lift production of oil wells: piecewise linear formulation and computational analysis*; February; 159

Narasimhan, R., S. Talluri and W. Chung; *An optimization model for phased supplier integration into e-procurement systems*; May; 389

Niaki, S.T.A. and W.H. Iskander; *A principal-components approach to assign confidence intervals in steady-state simulation*; February; 103

Nottestad, D.A. and S. Kumar; *Capacity design: an application using discrete-event simulation and designed experiments*; September; 729

Nottestad, D.A. and S. Kumar; *Integrated simulation application design for short-term production scheduling*; September; 737

Plante, R.D., P.F. Zantek and G.P. Wright; *A self-starting procedure for monitoring process quality in multistage manufacturing systems*; April; 293
Powell, W.B., A. Marar and S. Kulkarni; *Combining cost-based and rule-based knowledge in complex resource allocation problems*; February; 145

Qi, X., M. Xu, G. Yu and H. Zhang; *Coordinating dyadic supply chains when production costs are disrupted*; September; 765

Ren, H. and M.X. Weng; *An efficient priority rule for scheduling job shops to minimize mean tardiness*; September; 789

Shrivastava, A.K., S.S. Mandroli and Y. Ding; *A survey of inspection strategy and sensor distribution studies in discrete-part manufacturing processes*; April; 309
Singh, M.P. and M.M. Srinivasan; *An efficient exact procedure for the analysis of the state-dependent polling model*; February; 139
Srinivasan, M.M. and M.P. Singh; *An efficient exact procedure for the analysis of the state-dependent polling model*; February; 139
Steiger, N.M., E.K. Lada and J.R. Wilson; *Performance evaluation of recent procedures for steady-state simulation analysis*; September; 711

Talluri, S., W. Chung and R. Narasimhan; *An optimization model for phased supplier integration into e-procurement systems*; May; 389
Tsui, K.-L., V.C.P. Chen, R.R. Barton and M. Meckesheimer; *A review on design, modeling and applications of computer experiments*; April; 273

van Dorp, J.R. and S. Kotz; *A novel method for fitting unimodal continuous distributions on a bounded domain utilizing expert judgment estimates*; May; 421
Van Nieuwenhuyse, I. and N. Vandaele; *Analysis of gap times in a two-stage stochastic flowshop with overlapping operations*; September; 777
Vandaele, N. and I. Van Nieuwenhuyse; *Analysis of gap times in a two-stage stochastic flowshop with overlapping operations*; September; 777
Veermani, D. and D. Mishra; *An ascending price procurement auction for multiple items with unit supply*; February; 113

Wang, H. and Q. Huang; *Error cancellation modeling and its application to machining process control*; April; 355
Wang, X., E.A. Elsayed and H. Liao; *An extended linear hazard regression model with application to time-dependent dielectric breakdown of thermal oxides*; April; 329
Weng, M.X. and H. Ren; *An efficient priority rule for scheduling job shops to minimize mean tardiness*; September; 789
Wilson, J.R., E.K. Lada and N.M. Steiger; *Performance evaluation of recent procedures for steady-state simulation analysis*; September; 711
Wright, G.P., P.F. Zantek and R.D. Plante; *A self-starting procedure for monitoring process quality in multistage manufacturing systems*; April; 293
Wu, Z. and S. Zhang; *Monitoring the process mean and variance using a weighted loss function CUSUM scheme with variable sampling intervals*; April; 377

Xu, M., X. Qi, G. Yu and H. Zhang; *Coordinating dyadic supply chains when production costs are disrupted*; September; 765

Yu, G., M. Xu, X. Qi and H. Zhang; *Coordinating dyadic supply chains when production costs are disrupted*; September; 765

Zantek, P.F., G.P. Wright and R.D. Plante; *A self-starting procedure for monitoring process quality in multistage manufacturing systems*; April; 293
Zhang, H., M. Xu, X. Qi and G. Yu; *Coordinating dyadic supply chains when production costs are disrupted*; September; 765
Zhang, S. and Z. Wu; *Monitoring the process mean and variance using a weighted loss function CUSUM scheme with variable sampling intervals*; April; 377
Zhao, J., M.M. Dessouky, Q. Lu and R.C. Leachman; *An exact solution procedure to determine the optimal dispatching times for complex rail networks*; February; 127
Zhou, S. and N. Jin; *Signature construction and matching for fault diagnosis in manufacturing processes through fault space analysis*; April; 341
Zhou, S. X. and X. Chao; *Joint inventory-and-pricing strategy for a stochastic continuous-review system*; May; 401
Zhu, J., W.D. Cook and R.H. Green; *Dual-role factors in data envelopment analysis*; February; 91

SUBJECT INDEX FOR 2006

1250 –
Wang, H. and Q. Huang; *Error cancellation modeling and its application to machining process control*; April; 355

2015 – Integer programming
Dessouky M.M., Q. Lu, J. Zhao and R.C. Leachman; *An exact solution procedure to determine the optimal dispatching times for complex rail networks*; February; 127
Camponogara, E. and P. Nakashima; *Optimizing gas-lift production of oil wells: piecewise linear formulation and computational analysis*; February; 159
Talluri, S., W. Chung and R. Narasimhan; *An optimization model for phased supplier integration into e-procurement systems*; May; 389

2035 – Data envelopment analysis
Cook, W.D., R.H. Green and J. Zhu; *Dual-role factors in data envelopment analysis*; February; 91

2140 – Engineering statistics
Chen, V.C.P., K.-L. Tsui, R.R. Barton and M. Meckesheimer; *A review on design, modeling and applications of computer experiments*; April; 273

2150 – Queueing systems
Srinivasan M.M. and M.P. Singh; *An efficient exact procedure for the analysis of the state-dependent polling model*; February; 139

2220 – Integration of data and knowledge
Marar, A., W.B. Powell and S. Kulkarni; *Combining cost-based and rule-based knowledge in complex resource allocation problems*; February; 145

2245 –
Mandroli, S.S., A.K. Shrivastava and Y. Ding; *A survey of inspection strategy and sensor distribution studies in discrete-part manufacturing processes*; April; 309

2300 – Simulation
Niaki, S.T.A. and W.H. Iskander; *A principal-components approach to assign confidence intervals in steady-state simulation*; February; 103

2305 – Design of experiments
Batur, D. and S.-H. Kim; *Fully sequential selection procedures with a parabolic boundary*; September; 749

Chen, V.C.P., K.-L. Tsui, R.R. Barton and M. Meckesheimer; *A review on design, modeling and applications of computer experiments*; April; 273

Kumar, S. and D.A. Nottestad; *Capacity design: an application using discrete-event simulation and designed experiments*; September; 729

2310 – Input modeling

Munakata, T. and A. Fadlalla; *Constraint isomorphism and the generation of stochastic data*; May; 437

2330 – Output analysis

Lada, E.K., N.M. Steiger and J.R. Wilson; *Performance evaluation of recent procedures for steady-state simulation analysis*; September; 711

2470 – Life-cycle models

Hartman, J.C. and A. Murphy; *Finite-horizon equipment-replacement analysis*; May; 409

2480 – Financial Engineering

Mishra, D. and D. Veermani; *An ascending price procurement auction for multiple items with unit supply*; February; 113

3010 – Control policy

Chao, X. and S.X. Zhou; *Joint inventory-and-pricing strategy for a stochastic continuous-review system*; May; 401

3050 – Multi-stage systems

Zantek, P.F., G.P. Wright and R.D. Plante; *A self-starting procedure for monitoring process quality in multistage manufacturing systems*; April; 293

3150 – Supply chain management

Xu, M., X. Qi, G. Yu and H. Zhang; *Coordinating dyadic supply chains when production costs are disrupted*; September; 765

3530 – Production scheduling

Weng, M.X. and H. Ren; *An efficient priority rule for scheduling job shops to minimize mean tardiness*; September; 789

3580 – Stochastic scheduling

Kumar, S. and D.A. Nottestad; *Integrated simulation application design for short-term production scheduling*; September; 737

Van Nieuwenhuyse, I. and N. Vandaele; *Analysis of gap times in a two-stage stochastic flowshop with overlapping operations*; September; 777

4120 – Design of experiments

Chen, V.C.P., K.-L. Tsui, R.R. Barton and M. Meckesheimer; *A review on design, modeling and applications of computer experiments*; April; 273

4220 – Probability modeling

Kotz, S. and J.R. van Dorp; *A novel method for fitting unimodal continuous distributions on a bounded domain utilizing expert judgment estimates*; May; 421

4320 – Inspection

Mandroli, S.S., A.K. Shrivastava and Y. Ding; *A survey of inspection strategy and sensor distribution studies in discrete-part manufacturing processes*; April; 309

Jin, N. and S. Zhou; *Signature construction and matching for fault diagnosis in manufacturing processes through fault space analysis*; April; 341

Wang, H. and Q. Huang; *Error cancellation modeling and its application to machining process control*; April; 355

4340 – Statistical quality control

Jin, N. and S. Zhou; *Signature construction and matching for fault diagnosis in manufacturing processes through fault space analysis*; April; 341

Wang, H. and Q. Huang; *Error cancellation modeling and its application to machining process control*; April; 355

Zantek, P.F., G.P. Wright and R.D. Plante; *A self-starting procedure for monitoring process quality in multistage manufacturing systems*; April; 293

Zhang, S. and Z. Wu; *Monitoring the process mean and variance using a weighted loss function CUSUM scheme with variable sampling intervals*; April; 377

4440 – Accelerated life testing

Elsayed, E.A., H. Liao and X. Wang; *An extended linear hazard regression model with application to time-dependent dielectric breakdown of thermal oxides*; April; 329

4460 –

El-Ferik, S. and M. Ben-Daya; *Age-based hybrid model for imperfect preventive maintenance*; April; 365

4740 –

Elsayed, E.A., H. Liao and X. Wang; *An extended linear hazard regression model with application to time-dependent dielectric breakdown of thermal oxides*; April; 329

Jin, N. and S. Zhou; *Signature construction and matching for fault diagnosis in manufacturing processes through fault space analysis*; April; 341

QUALITY & RELIABILITY ENGINEERING

AUTHOR INDEX FOR 2006

Albin, S.L. and D. Xu; *Optimizing settings by accounting for uncontrollable material and environmental variables*; December; 1085

Bae, S.J. and P.H. Kvam; *A change-point analysis for modeling incomplete burn-in for light displays*; June; 489
Ben-Gal, I. and H. Ginsburg; *Designing experiments for robust-optimization problems: the V_s-optimality criterion*; June; 445
Bensmail, H., C.-H. Wang and W. Kuo; *Detection and classification of defect patterns on semiconductor wafers*; December; 1059

Coit, D.W., J.E. Ramirez-Marquez and M. Tortorella; *A generalized multistate-based path vector approach to multistate two-terminal reliability*; June; 477

Dasu, T. and T. Johnson. Reviewed by J.C.C. Tsai; *Review of Exploratory data mining and data cleaning*; December; 1132
Ding, Y., Y. Ren and S. Zhou; *A data mining approach to study the significance of nonlinearity in multistation assembly processes*; December; 1069

Ginsburg, H. and I. Ben-Gal; *Designing experiments for robust-optimization problems: the V_s-optimality criterion*; June; 445
Giudici, P. Reviewed by W. Jiang; *Applied data mining – statistical methods for business and industry*; December; 1131
Goh, T.N., C.W. Zhang and M. Xie; *Design of exponential control charts using a sequential sampling scheme*; December; 1105

H. Shore; *Control charts for the queue length in a G/G/S system*; December; 1117
Hamada, M. and C.F.J. Wu, Reviewed by V.R. Joseph; *Experiments: Planning, analysis, and parameter design optimization*; June; 521

Johnson, T. and T. Dasu, Reviewed by J.C.C. Tsai; *Review of exploratory data mining and data cleaning*; December; 1132

Kapur, K.C. and Y.-W. Liu; *Reliability measures for dynamic multistate nonrepairable systems and their applications to system performance evaluation*; June; 511
Kuo, W., C.-H. Wang and H. Bensmail; *Detection and classification of defect patterns on semiconductor wafers*; December; 1059
Kvam, P.H. and S.J. Bae; *A change-point analysis for modeling incomplete burn-in for light displays*; June; 489

Levitin, G. and M. Xie; *Performance distribution of a fault-tolerant system in the presence of failure correlation*; June; 499
Liu, Y.-W. and K.C. Kapur; *Reliability measures for dynamic multistate nonrepairable systems and their applications to system performance evaluation*; June; 511

Maillart, L.M.; *Maintenance policies for systems with condition monitoring and obvious failures*; June; 463

Qiu, P. Reviewed by A.B. Yeh; *Image processing and jump regression Analysis*; June; 522

Ramirez-Marquez, J.E., D.W. Coit and M. Tortorella; *A generalized multistate-based path vector approach to multistate two-terminal reliability*; June; 477
Ren, Y., Y. Ding and S. Zhou; *A data mining approach to study the significance of nonlinearity in multistation assembly processes*; December; 1069
Richard, J.-P.P. and M.U. Thomas; *Warranty-based method for establishing reliability improvement targets*; December; 1049

Thomas, M.U. and J.-P.P. Richard; *Warranty-based method for establishing reliability improvement targets*; December; 1049
Tortorella, M., J.E. Ramirez-Marquez and D.W. Coit; *A generalized multistate-based path vector approach to multistate two-terminal reliability*; June; 477

Wang, C.-H., W. Kuo and H. Bensmail; *Detection and classification of defect patterns on semiconductor wafers*; December; 1059
Wang, Z., C. Zou and Y. Zhang; *A control chart based on a change-point model for monitoring linear profiles*; December; 1093
Wu, C.F.J. and M. Hamada. Reviewed by V.R. Joseph; *Experiments: Planning, analysis, and parameter design optimization*; June; 521

Xie, M. and G. Levitin; *Performance distribution of a fault-tolerant system in the presence of failure correlation*; June; 499
Xie, M., C.W. Zhang and T.N. Goh; *Design of exponential control charts using a sequential sampling scheme*; December; 1105
Xu, D. and S.L. Albin; *Optimizing settings by accounting for uncontrollable material and environmental variables*; December; 1085

Zhang, C.W., M. Xie and T.N. Goh; *Design of exponential control charts using a sequential sampling scheme*; December; 1105
Zhang, Y., C. Zou and Z. Wang; *A control chart based on a change-point model for monitoring linear profiles*; December; 1093
Zhou, S., Y. Ren and Y. Ding; *A data mining approach to study the significance of nonlinearity in multistation assembly processes*; December; 1069
Zou, C., Y. Zhang and Z. Wang; *A control chart based on a change-point model for monitoring linear profiles*; December; 1093

SUBJECT INDEX FOR 2006

410 – Semiconductor industry
Wang, C.-H., W. Kuo and H. Bensmail; *Detection and classification of defect patterns on semiconductor wafers*; December; 1059

2150 – Queueing systems
Shore, H.; *Control charts for the queue length in a G/G/S system*; December; 1117

4120 – Design of experiments
Ginsburg, H. and I. Ben-Gal; *Designing experiments for robust-optimization problems: the V_s-optimality criterion*; June; 445
Ren, Y., Y. Ding and S. Zhou; *A data mining approach to study the significance of nonlinearity in multistation assembly processes*; December; 1069

4260 – Inference

Bae, S.J. and P.H. Kvam; *A change-point analysis for modeling incomplete burn-in for light displays*; June; 489

4320 – Inspection

Wang, C.-H., W. Kuo and H. Bensmail; *Detection and classification of defect patterns on semiconductor wafers*; December; 1059

4340 – Statistical quality control

Shore, H.; *Control charts for the queue length in a G/G/S system*; December; 1117

Xu, D. and S.L. Albin; *Optimizing settings by accounting for uncontrollable material and environmental variables*; December; 1085

Zhang, C.W., M. Xie and T.N. Goh; *Design of exponential control charts using a sequential sampling scheme*; December; 1105

Zou, C., Y. Zhang and Z. Wang; *A control chart based on a change-point model for monitoring linear profiles*; December; 1093

4460 – Maintenance

Maillart, L.M.; *Maintenance policies for systems with condition monitoring and obvious failures*; June; 463

4470 – Reliability prediction

Bae, S.J. and P.H. Kvam; *A change-point analysis for modeling incomplete burn-in for light displays*; June; 489

Levitin, G. and M. Xie; *Performance distribution of a fault-tolerant system in the presence of failure correlation*; June; 499

Liu, Y.-W. and K.C. Kapur; *Reliability measures for dynamic multistate nonrepairable systems and their applications to system performance evaluation*; June; 511

Ramirez-Marquez, J.E., D.W. Coit and M. Tortorella; *A generalized multistate-based path vector approach to multistate two-terminal reliability*; June; 477

4480 – Warranty

Thomas, M.U. and J.-P.P. Richard; *Warranty-based method for establishing reliability improvement targets*; December; 1049

GUEST REVIEWERS FOR 2006

Allison Jones-Farmer, Aurburn University
Andrew Jardine, University of Toronto
Antonio Pievatolo, IMATI, CNR, Italy
Argon Chen, National Taiwan University
B. J. Kim, Louisiana Tech University
Byung Cho, Clemson University
Chang-Ho Chin, Kyung Hee University
Charles W. Champ, Geogia Southern University
Christina Mastrangelo, University of Washington
Chunghun Ha, Texas A&M University
Connie Borror, University of Illinois at Urbana-Champaign
Daniel W. Apley, Northwestern University
David He, University of Illinois at Chicago
Di Xu, Florida State University
Diane Lambert, Bell Labs, Lucent Technologies
Douglas Hawkins, University of Minnesota
Dragan Djurdjanovic, University of Michigan
El-Ferik Sami, KFUPM, Saudi Arabia
Eli Snir, Southern Methodist University
Elmira Popova, University of Texas
Engshwe Ho, Business Intelligence
Feng Zhang, Fairchild Semiconductor
Francis Pascual, Washington State University
Fugee Tseng, National University of Singapore
Fugee Tsung, Hong Kong University of Science & Technology
George Runger, Arizona State University
Giovanna Capizzi, University of Padua
Guangbin Yang, Ford Company
Haitao Liao, Wichita State University
Harriet Nembhard, Pennsylvania State University
Hoang Pham, Rutgers University
Hong Wan, Purdue University
Hongbin Jia, OG Technologies, Inc.
Hsien-Chung Wu, National Kaohsiung Normal University
Hyun-Woo Cho, University of Tennessee
Indra Gunawan, Malaysia University of Science and Technology
Ingolfsson, Armann, University of Alberta
Irad Ben-Gal, Tel Aviv University
J. D. Wang, Nanjing University
Jack S. Hu, University of Michigan
James Benneyan, Northeastern University
James Schott, University of Central Florida
Jian Liu, University of Michigan
Jim Lee, University of Louisiana, Lafayette
Jim Wilson, North Carolina State University
Jing Li, University of Michigan
Jionghua Jin, University of Michigan
John Usher, University of Louisville
Jose Ramirez-Marquez, Stevens Institute of Technology
Judong Shen, GlaxoSmithKline Ltd.
Judy Jin, University of Michigan at Ann Arbor
Jun Bai, Rutgers University
Justin Chimka, University of Arkansas
Jye-Chyi Lu, Georgia Institute of Technology
Kai Yang, Wayne State University
Kailish Kapur, University of Washington
Kyangmee Kim, Konkuk University
Levitens, Gregory, The Israel Electric Corporation Ltd.
Lianjie Shu, University of Macau
Lie-Fern Hsu, Baruch College, CUNY
Lisa Maillart, University of Pittsburgh
Liudong Xing, University of Massachusetts, Dartmouth
Mainak Mazumdar, University of Pittsburgh
Majid Jaraiedi, West Virginia University
Marcus Perry, Air Force Institute of Technology
Marion Reynolds, Virginia Polytechnic Institute and State University
Maurizio Guida, University of Salerno, Italy
Mehmet Sahinoglu, Troy State University
Min Xie, National University of Singapore
Min-Sheng Lin, National Taipei University of Technology
Munju Agarwal, University of Delhi
Myong Jeong, University of Tennessee
Nasser Fard, Northeastern University
Olivier Gaudoin, INP Grenoble, France
Paul Zantek, University of Maryland
Philip Scarf, University of Salford, UK
Pornpen Chaipradubkiat, University of Michigan
Qiang Huang, University of South Florida
Qianmei Feng, University of Houston
Rajiv Sharma, Indian Institute of Technology
Rajiv Shivpuri, The Ohio State University
Rassoul Noorossana, Iran University of Science and Technology
Refik Soyer, George Washington University
Renkuan Guo, University of Cape Town
Rong Pan, University of Texas, El Paso

Roshan Vengazhiyil, Georgia Tech
Ross Sparks, CSIRO
Ruey Huei Yeh, National Taiwan University of Science and Technology
S. J. Bae, Han Yang University
S. T. Tseng, National Tsing Hua University
Sarintip Satitsatian, University of Washington
Seong-Hee Kim, Georgia Institute of Technology
Seoung Bum Kim, University of Texas, Arlington
Shaomin Wu, The University of Reading
Shey-Huei Sheu, National Taiwan University of Science and Technology
Shing Chang, Kansas State University
Shiyu Zhou, University of Wisconsin at Madison
Shuchun Wang, Bank of America
Shuo-Jye Wu, Tamkang University, Taiwan
Skrivanek Jaroslav, The Technical University of Košice
Sresh Nair, University of Connecticut
Suprasad Amari, Relex Software Corporation
Susan Albin, Rutegers University
Suzy Jiang, Global Concepts Inc.
Terje Aven, University of Stavanger
Terry Murphy, Yale University
Uday Kumar, Lulea University
V. Makis, University of Toronto
Venkatasubram Venkat, Purdue University
Victoria Chen, University of Texas, Arlington
Wei Chrn, Northwestern University
Wei Jiang, Stevens Institute of Technology
Wei-Chang Yeh, National Tsing Hua University
Weiping Zhong, Bayer HealthCare
Wenbin Wang, University of Salford
Wendai Wang, General Electric Co.
William Hsu, Kansas State University
William Meeker, Iowa State University
William Scherer, University of Virginia
William Woodall, Virginia Polytechnic Institute and State University
Winson Taam, The Boeing Company
Xiaoming Huo, Georgia Institute of Technology
Xuemei Shan, Northwestern University
Y. K. Lin, VNU Taiwan
Y. Komori, Kyushu Institute of Technology
Yeu-Shiang Huang, National Cheng Kung University
Yong Chen, University of Iowa
Yong Huang, Clemson University
Youn-Min Chou, University of Texas at San Antonio
Zhang Wu, Nanyang Technological University
